

The **resealable** sheet system, **eniReseal®**, used as a lid for punnets containing **FRESH FRUIT AND VEGETABLES** offers an innovative and pleasant experience to the user, who can **open and close the package multiple times**. Its shape and opening size can be customized as requested.

Before opening it, this packaging is **100% hermetic** and, since it is resealable, it protects the food inside from untimely deterioration once opened, and keeps its organoleptic properties longer. Its self-adhesive closing system easily works by applying a slight pressure, which is ideal for an intermittent consumption of its content.

It is easy to open, thus avoiding common tearing of the lid when opening it.

No adhesive labels.

It reduces food waste, since they are kept in a proper organoleptic state and suitable for consumption.

Possibility to use **recyclable materials**

**Open and Close
the package
multiple times**
